

# EECP

(Enhanced External Counter Pulsation)

The effective heart treatment that fits your budget  
and your life!

406-431-7332

If **80%** of coronary stents and cardiac bypass surgeries could be prevented with a non-invasive treatment don't **YOU** think patients would prefer that?

What if the treatment were **HALF** the cost of just your out-of-pocket expenses for a bypass?

What if you could work it into your **daily life** for a few weeks and still go do all the things that are important to you?

**NOW** you can have a healthy heart with confidence and convenience at:

**Physician Supervised**

900 N. Montana Ave, Suite B9

**Call NOW for consultation and screening to see if  
EECP is right for you! 406-431-7332**

## **BUT-How do you know if you're at risk?**

I recently talked with an acquaintance who had heard me talk about EECP but she didn't think she or her husband needed it. THEN-while out of town her husband had severe chest pain from a heart attack, Bypass surgery (CABG x3) came the next day and now he will have to take the next two months off work. He owns his own business so he's concerned if it will not survive without him there. PLUS-he had to be life-flighted to a hospital that does bypass surgery which added another \$60,000 to the bill. He has good insurance but his out of pocket expenses will be around \$75,000! Oh how I wish he would have done EECP for just \$4000! But how do you know?!?!

### **You may be at risk of heart disease if you:**

- Have had untreated sleep apnea for more than 5 years
- Have Diabetes or have high triglycerides in your lab lipid panel  
(if you take insulin injections-you are at very high risk)
- Have had chest pains or heaviness
- Have had Shortness of breath
- Pain in jaw, shoulder or arm
- Have unexplained nausea or indigestion
- Have experienced palpitations
- Try to exercise but become exhausted quickly
- Have a had a desk job for more than 15 years without regular exercise
- Family history of heart disease
